19 August 1957

Hycon Mfg. Company  
Pasadena, California

Gentlemen:

Reference is made to several discussions concerning the future need for a permanent group of persons at the site for continued testing of the "B" configuration and additional special tests as directed.

It is requested that as the trainees presently under FS-99 are detached for special duty with the "C" configuration you phase in permanent personnel up to a total of 3 persons to continue tests. These tests will include final checkout of remaining "B" configurations and additional special tests as required and directed by the Contracting Officer or his representatives.

The cost of this work is to be charged to BC-200 under appropriate categories thereunder. If and when funds are exhausted thereunder consideration for additional funding will be given.

If a negotiation for a fixed price on BC-200 is contemplated before completion a proposal covering additional special testing would be necessary. Costs attributed to any special tests (beyond initial acceptance tests for "B" Configuration) should be segregated in your books.

Very truly yours,

25X1A9a

  
Contracting Officer
